

Soil Surfactant | **Foliar Adjuvant** | Utility

# CONIC

**CONIC** is a 100% high concentrate methylated seed oil surfactant specifically designed to enhance performance of postemergence herbicides. **CONIC** can be used when the label calls for a non-ionic surfactant or petroleum-based crop oil concentrate. **CONIC** contains high quality surfactants, making it a superior choice on hard-to-control weeds or when the pesticide label recommends an MSO surfactant.

**Postemergence Herbicides | High Concentrate | Low Use Rate**

#### Application Instructions:

**Turf and Ornamental:** 1-2 pints / acre

**Non-Crop:** 1-2 pints / acre

**Agriculture:** 1-2 pints / acre

**Herbicides:** 1-2 pints / acre

#### *Features and Benefits*

- Spreader
- Improved cuticle penetration
- Increases herbicide uptake
- Low use rate
