

VERTICAL™

0-0-8

FUEL FOR BOTH PLANT & SOIL

Improved Soil & Plant Strength

Improved Rooting Technology

Stress Fighting Power

VERTICAL™ works vertically from the rhizosphere to the tips of leaf blades creating a never before synergy between plant and soil. In the soil VERTICAL's unique three part blend of functional carbon drives incredible nutrient availability while providing a food source for beneficial microorganisms. VERTICAL is a unique formulation of rich organic material blended with a proprietary sugar complex, potassium chelated with carbon, a Turf Fuel-only rooting technology and our university tested Nutrifense™ technology. VERTICAL will make both your plant and soil stronger than ever.

GUARANTEED NUTRITIONAL ANALYSIS

Soluble Potash (K₂O) 8.0%

Derived from: Potassium humate, potassium acetate, proprietary carbohydrate blend.

Application Rate:

3 - 6 fl. oz. / 1,000 ft²
every 7 - 14 days.

Use VERTICAL at 6 fl. oz. / 1,000 ft² every 14 days on golf greens, tees and athletic fields. Decrease rates for more frequent applications. If Turf Fuel ELEMENT 6 is included in the spray tank, VERTICAL can be reduced to 3 fl. oz./ 1000 ft². VERTICAL can be used at 3 fl. oz./ 1000 ft² on higher cut turf such as home lawns and golf course rough. Use more frequently during stress periods or in recovery situations. VERTICAL does not need to be watered in immediately. Use caution when mixing with products with pH below 2. A standard quart jar test is always recommended when mixing VERTICAL with other products.

Net weight: 11.42 lbs / gal

VERTICAL™ 0-0-8

FUEL FOR BOTH PLANT & SOIL

Powered by Nutrifense, VERTICAL instantly gives treated plants a better chance of survival against intense stress. This university tested technology supplies plants with needed resources for fighting stress while activating powerful plant defense systems. Once activated, these systems work to thicken cell walls, initiate new growth and build awesome plant vigor.

NUTRIFENSE TECHNOLOGY

CONTROL

ABOVE GROUND:

- Anti-stress technology
- Wellness triggers
- Super efficient potassium
- Antioxidants
- Growth promotion
- Improved photosynthesis

BELOW GROUND:

- Rooting technology
- Food for soil microbiology
- Proprietary three part functional carbon blend
- Improved nutrient availability
- Key sugars for plant strength and microbial stimulation
- Rich carbon supply for rhizosphere

HOW TO USE VERTICAL:

Cool Weather:

VERTICAL works to supply otherwise stagnant soil biology with critical food sources while the super reactive potassium works to improve the flow of nutrients and water within the plant.

Warm/Hot Weather:

VERTICAL works to supply the plant with technologies proven to increase survival rates in harsh environments (drought stress, high temperature, high traffic)

Prevention:

VERTICAL is a great choice when preparing turf for upcoming stress. This could be defense against freezing temperatures and harsh winter winds or warm season turf transition and high traffic. VERTICAL builds a synergy between plant and soil for the best performance possible.
