

Soil Surfactant | Foliar Adjuvant | **Utility**

# K.O.

**K.O.** is a water-based, silicone emulsion, antifoam/defoam formulation. **K.O.** will prevent foam formation and knockdown existing foam in the spray tank. It's ideal for use with herbicides and other pesticides that cause excessive foaming during mixing and with spray equipment that continuously agitates spray solutions. **K.O.** is extremely effective, works fast, and lasts.

## Prevent Foaming | Stop Foaming | Low Use Rate

### Application Instructions:

**Pre-treat (anti-foam):** Add 1-4 fl. oz. to the spray tank water before the addition of pesticides.

**Knockdown (defoam):** Add 1-2 fl. oz. into foam and wait 30-60 seconds. If necessary, add additional 1-2 fl. oz. until resolved.

### Features and Benefits

- Pre-treat tank water
- Knocks down existing foam
- Reduces mixing time
- Low use rate
