

Summer Endurance™

During the spring, turf thrives and performs at its highest level. Once the temperature and humidity rise, energy, stress tolerance and density bleed out of the plant as heat stress sets in. Turf Fuel's Summer endurance program delivers the critical nutrients and energy forms to help turf sustain optimum quality right through the dog days.

RECOMMENDED PRODUCTS

VERTICAL®

3 fl.oz / 1,000 ft²

A complete plant and soil health supplement. VERTICAL™ contains a proprietary sugar extract specific to enhance plant and soil health. By energizing the soil, more CO₂ is liberated to fuel photosynthesis.

MZ-23™

3 fl.oz / 1,000 ft²

A strong dose of manganese, zinc, phosphite and sea weed extract, MZ-23™ provides the essential micronutrients required to maximize strength in the root system and the foliage.

RESPO FUEL®

3 fl.oz / 1,000 ft²

With Nutrifense. Extreme stress prevention and mitigation with foliar calcium, sea kelp, silica, copper, salicylic acid, and our proprietary SAR initiator Nutrifense. A must have for intensely managed turf in the heat of the summer.

PRODUCT RATE RECOMMENDATIONS

3-4 DAY INTERVAL (INTENSE RECOVERY STRATEGY)

Apply 2 fl.oz of Vertical, 2 fl.oz MZ-23 and Respo Fuel per 1,000 ft²

7 DAY INTERVAL

Apply 3 fl.oz of Vertical, 3 fl.oz MZ-23 and Respo Fuel per 1,000 ft²
