

LA Phite 2-0-16

LA Phite 2-0-16 is a potassium foliar fertilizer derived from potassium phosphite. Do not mix with copper-based products unless the pH is over 6.5.

Applications	Rates & Comments
Cool and Warm Season Turf	Apply 0.5 - 2.0 ounces per 1,000 sq. ft.
Use biweekly throughout growing season. Use lower rates on a more frequent basis or during non-stressful times.	
Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden	

GUARANTEED ANALYSIS:

Total Nitrogen (N) 2.0%
 1.0% Urea nitrogen (N)
 0.5% Ammoniacal nitrogen (N)
 0.5% Nitrate nitrogen (N)

Soluble Potash (K₂O) 16.0%

Derived from: urea-ammonium nitrate, potassium phosphite

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.aapfco.org/metals.htm>

*Phosphorous acid products are for use as a supplemental fertilizer treatment.

*Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or will be used directly by plants, as phosphite ions.

*As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed. In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5
