

HULK

A PIGMENT BUILT TO PROTECT

ENHANCED TURF COLOR | UVB PROTECTION | FLEXIBLE RATE

HULK is a natural deep green turf pigment designed to protect turf from the harsh daily stress of UV light. **HULK**'s primary purpose is to filter out harmful UVB light rays and let the beneficial light in for optimal photosynthesis.

HULK contains a UVB filter material and a specific blend of pigments to maximize health on both warm and cool season grasses.

The rich forrest green color assures you that with **HULK** on the property, all is well.

USE RATES:

Maintenance rate: 16oz/50 gallon spray solution per acre.

Heavy Stress: 16-32oz/50 gallons spray solution per acre.

Rates effective on both warm and cool season grasses.

Rainfast in 1 Hour
