

Tank pHix WC

Spray Tank Buffering Agent

Tank pHix WC is a spray tank acidifying agent capable of reducing tank pH levels to prevent alkaline hydrolysis (the chemical degradation of pesticides at a higher pH). **Tank pHix WC** lowers the pH of the spray solution and reduces hard water cations, known to impact pesticide performance.

PRINCIPAL FUNCTIONING AGENTS:

2-Hydroxypropane-1,2,3-tricarboxylic	
acid	47.00
Constituents Ineffective as	
Spray Adjuvants	53.00%
TOTAL:	1009

DIRECTIONS FOR USE

Add appropriate amount of Tank pHix to spray tank solution prior to the addition of pesticides and fertilizers. The typical rate for Tank pHix is 1-2 fl. oz. per 100 gallons of water.

FIRST AID

Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment. If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable mouth to mouth if possible. If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. If skin irritation or rash occurs: seek medical advice/attention. Wash contaminated clothing before reuse. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

Optimal pH range for alkaline hydrolysis prevention = 5.0-6.0

Net Contents: 2.5 Gallons (9.46 L)

TANK PHIX WC

Keep out of reach of children. Read label before use. If medical advice is needed: Have product container label at hand.

HAZARD STATEMENTS

Causes severe skin burns and eye damage Causes serious eye damage May cause an allergic skin reaction

PRECAUTIONARY STATEMENTS PREVENTION

Wear protective gloves and eye protection Avoid breathing mist/vapours/spray

Contaminated work clothing should not be allowed outside of the workplace

Wash face, hands, and any exposed skin thoroughly after handling

GENERAL INFORMATION: *Tank pHix WC* is a spray tank acidifying agent capable of reducing tank pH levels to prevent alkaline hydrolysis (the chemical degradation of pesticides at a higher pH).

DIRECTIONS FOR USE: Add appropriate amount of *Tank pHix WC* to spray tank solution prior to the addition of pesticides and fertilizers. The typical rate for *Tank pHix WC* is 1-2 fl oz. per 100 gallons of water

SHAKE WELL BEFORE USING

Personal Protective Equipment: Wear chemical resistant gloves, Long-sleeved shirt and long pants, and shoes plus socks.

FIRST AID

Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable mouth to mouth if possible.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.

If skin irritation or rash occurs: seek medical advice/attention. Wash contaminated clothing before reuse.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL

STORAGE: Store locked up away from unauthorized persons, children and animals. Store in original container only or a corrosive resistant container with a resistant inner liner. Store in a well-ventilated place. Keep container tightly closed. Do not contaminant other pesticides, fertilizers, food or feed.

DISPOSAL: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best method of disposing containers if allowed by law. The Agriculture Container Recycling Counsel (ACRC) operates the national recycling center program. To contact your state and local ACRC visit the ACRC website at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations. **CLEAN UP:** Rinse each spray tank out after each use and flush thoroughly.

WARRANTY STATEMENT: Target Specialty Products represents and warrants that its products are manufactured in accordance with the products specification and that its products at the time of delivery to the purchaser shall be free from all material defects. Target Specialty Products makes no warranty of any kind, expressed or implied, concerning the product, including but not limited to the implied warranties, merchant liability. and fitness for a particular purpose are disclaimed. Further it is understood and agreed that Target Specialty Products liability will not exceed that of the return amount of the purchase price paid by the purchaser. And under no circumstances shall Target Specialty Products be liable for special or indirect, incidental, circum-stantial or punitive damages. Any use not in accordance with the product directions and precautionary statements, or modifi-cations or additives, adulterations, dilutions or alterations by the purchaser shall void this warranty.
