

Winter Hardiness™

Give your turf the best chance of survival and spring performance with biweekly applications of Turf Fuel's University proven Winter Hardiness Program. Turf Fuel's Element 6® and Base K26™ treated turf had the highest percentage of regrowth 20 days after removal from either 40 or 60 days of ice cover.

RECOMMENDED

ELEMENT 6®
3 fl.oz / 1,000 ft²

Provides plants with the components needed for turf strength conditioning, maximum energy generation and root production. Powered by university proven NUTRIFENSE® technology.

BASE K26™
6-9 fl.oz / 1,000 ft²

A high K formulation utilizing an ultra safe and highly absorbed potassium acetate fortified with proprietary G2D™ biostimulant technology.

MZ-23™
3 fl.oz / 1,000 ft²

A strong dose of manganese, zinc, phosphite and sea weed extract, MZ-23™ provides the essential micronutrients required for many essential plant functions. Gain right color without growth going into along hard winter.
