

# WARM SEASON™ Winter

In the southern United States, winter is the season for play even though the weather isn't always favourable for plant health. The name of the game is maintaining turf growth, recovery, color and vigor during the winter playing season. Turf Fuel's Warm Season Winter program provides highly available forms of nutrients, biostimulants and potent energy bearing compounds to keep turf firing on all cylinders.

## RECOMMENDED

**VERTICAL™**  
6 fl.oz / 1,000 ft<sup>2</sup>

A complete plant and soil health supplement. VERTICAL™ contains a proprietary sugar extract specific to enhance plant and soil health. By energizing the soil, more CO<sub>2</sub> is liberated to fuel photosynthesis.

**PHOTO FUEL®**  
3 fl.oz / 1,000 ft<sup>2</sup>

Enhances photosynthesis through nutrition and bio stimulation. Contains all the essential nutrients to produce dense chlorophyll in the leaf along with our proprietary defence activator Nutrifense®

**QUICK GREEN™**  
6 fl.oz / 1,000 ft<sup>2</sup>

A high phosphate biostimulant fertilizer derived from quick reaction ammonium polyphosphate and urea ammonium nitrate. Perfect for promoting growth during cool soil temperatures.

## PRODUCT RATE RECOMMENDATIONS

### 14 DAY INTERVAL

Apply 6 fl.oz of VERTICAL and Quick Green and 3 fl. oz of Photo Fuel 0.1 lbs N/ 1000ft<sup>2</sup>

### PRO TIP

For enhanced color during the winter use with TS Pro Hulk Pigment. 16-32 ounces per acre.
